

# Workshop on Predictive Processing

**19.Jun - 22.Jun 2018**

**Cod. G01-18**

**Mod.:**

Face-to-face

**Edition**

2018

**Activity type**

Workshop

**Date**

19.Jun - 22.Jun 2018

**Location**

Miramar Palace

**Languages**

English

**Academic Validity**

40 hours

**Organising Committee**

## Description

The aim of the workshop is to discuss predictive coding and its underlying mechanisms from behavior to neuroscience. We aim at calling together researchers and students from various domains such as vision, audition and language, to build bridges between various research fields and share this common and exciting interest on prediction. For example, the meeting will provide language researchers (working on prediction) with the more important perspectives coming from other scientific fields of research (vision, auditory perception, decision making, attention, etc).

The conference will include invited speakers, regular talks, symposiums, and poster sessions. We are pleased to announce the presence of Sophie Scott, Moshe Bar and Pascal Fries as invited speakers.

## Objectives

To promote, through talks and symposiums, the exchange of ideas within the field of prediction among international experts of different disciplines.

To share the results obtained through research carried out in this area.

To build working arrangements between experts from the Basque Country and international experts.

To consolidate San Sebastián as the key meeting point for international researchers.

To flesh out this groundbreaking and pioneering area.
