## Description

**Este Curso tiene homologación del Dpto. de Educación del Gobierno Vasco para el profesorado no universitario (cód. homologación 2068170034).**

Este Curso online surge con objeto de dar difusión a la información recabada a través del proyecto de investigación “Sistematización de Buenas Prácticas inclusivas en la respuesta educativa al alumnado con Enfermedades Poco Frecuentes (2018-2020)” con el fin de ofrecer una respuesta educativa exitosa a las necesidades del alumnado con Enfermedades Raras (EERR) durante su escolarización. Ofrece un análisis de buenas prácticas educativas hacia el alumnado con EERR desde el punto de vista de diferentes profesionales del ámbito educativo y familiares de alumnado con EERR, recogiendo la experiencias de éxito de dos centros educativos de la Comunidad Autónoma Vasca, así como experiencias de distintos centros educativos de otras 11 comunidades autónomas a nivel nacional. A lo largo del Curso se presentan también otras iniciativas y proyectos de carácter nacional e internacional como modelos de trabajo que fomentan escuelas y entornos sociales más inclusivos a partir de la coordinación entre el ámbito educativo, sanitario y social. La participación de los y las profesionales, personas con EERR y familiares, en el análisis y reflexión, sobre los aspectos críticos en los procesos de inclusión, se estima que además de enriquecer los contenidos del curso servirán para fortalecer el modelo colaborativo de buenas prácticas.

## Objectives

Analizar experiencias de escolarización de alumnado con EERR en el estado español y en otros países.

Analizar buenas prácticas inclusivas a la hora de atender a este colectivo desde los planteamientos de las familias afectadas y de las y los profesionales de los centros educativos.

Comprender la importancia de formas de trabajo que implican una visión humanista de la educación y compromiso social tales como las que impulsan las asociaciones, el Diseño Universal de Aprendizaje y el ApS, en la atención a la diversidad.

Presentar una visión interdisciplinar de distintos profesionales del ámbito de la educación, para un abordaje inclusivo e interdisciplinar de las EERR.

## Course specific contributors

# **Program**

**09-11-2020 / 15-11-2020**

**Sistematización de Buenas Prácticas Inclusivas en la Respuesta Educativa al Alumnado con EERR**

“Diseño universal de aprendizaje ”

## Teachers

**Luis Miguel Aras Portilla**

SEMFYC

---

Dr. Luis Miguel Aras Portilla is a Spanish doctor specialized in Family and Community Medicine, an expert in palliative care who has worked in recent years in the field of hospital and pre-hospital emergencies. With the diagnosis of his youngest daughter of Dravet Syndrome, he now shares his work in vital emergencies with the management of patient-promoted entities that encourage research in neurosciences. After being part of other entities, since May 2015, he has been director of the ApoyoDravet association, an association that works to implement projects in the fields of precision medicine, patient-centred technology and social innovation. All this with the aim of improving the quality of life of those affected and their families and finding a cure for Dravet syndrome. Dr. Aras currently coordinates the INDRE research network, and advises various companies, research centres and other entities in the scientific and technological fields.

**Igone Aróstegui Barandica**

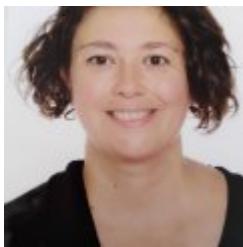

---

PhD in Philosophy and Educational Sciences and assistant professor in the Department of Didactics and School Organization in the Faculty of Education of the UPV/EHU in Bilbao. 10 years of experience in university teaching, with accreditation as an aggregate teacher. Teacher in the degrees of Infant and Primary Education, and in the University Master in Teacher Training. Experience as a teacher of special needs for 10 years, and in training for the employment of people with disabilities and people at risk of exclusion. Research activity in the field of inclusive education, training and accompaniment in the process of incorporation into employment of people in situations of disadvantage and social risk, participating in different projects and research contracts. Member of the INKLUNI research team.

**Naiara Berasategi**

---

### **Susana Carrey Braum**

---

My name is Susan Carrey. In May 2011 I was mother of a girl who was born with Recessive Dystrophic Epidermolysis Bullosa (Butterfly Skin). A disease considered rare that I had not heard about until that moment. As a result, together with my sister and a group of friends we founded Berritxuak, a non-profit association that aims to give visibility to these rare diseases and raise money for different research projects. From Berritxuak we have collaborated with: Debra international butterfly skin association, with Dravet Dravet syndrome association, with Stop San Filippo, for a clinical trial carried out between CIEMAT-UC3M-IISFJD1 and La Paz hospital for the treatment of butterfly skin, with the INKLUNI research team of the University of the Basque Country for the publication of several articles in scientific journals on the inclusive schooling of students suffering from minority diseases...

### **Leire Darretxe Urrutxi**

Universidad del País Vasco

---

PhD in Pedagogy, Pedagogy, Master in Special Education and Diploma in Teaching of Early Childhood Education. She has also trained in a biennial course on educational psychomotor practice and specialization course in Early Care. Since 2005 she is a teacher and researcher at the University of the Basque Country. Her research has deepened in various matters related to the field of educational and social inclusion, specifically in community action and vulnerable groups such as children in a situation of vulnerability and people with rare diseases. She has participated in various research projects (Training and Research Units in Education, Culture and Society; Accredited Group Category A Basque Government; Consolidated group of the University of the Basque Country; R+D+i; University-Society; Erasmus+, OTRI) and various educational innovation projects. She has made several stays as visiting professor in Spain (Sevilla, Vigo), UK (Sheffield, Exeter, Southampton), Holland, Ecuador and Chile.

### **Odet Moliner García**

---

Odet Moliner García is a Doctor in Philosophy and Educational Sciences from the University of Valencia and Professor in the Department of Pedagogy and Didactics of the CCSS, Language and Literature at the Universitat Jaume I in Castellón. She focuses her teaching activity on the Master's Degree in
