## Description

**This Summer Course will be held face-to-face and there will also be the possibility of participating live online through ZOOM. In the registration process, please select the participation of your choice: face-to-face or live online.**

Systemic autoimmune diseases (SAD) continue to be a big challenge for clinicians, given their complexity, clinical variability and potential impact in the life of patients, many of them young women.

Over the last 6 years, the Autoimmune Diseases Units from Cruces and Bordeaux University Hospitals have established a collaborative clinical and research program, including joined Lupus-Cruces and Lupus-Bordeaux research projects and annual Basque Lupus Seminars at Baiona.

In the 2018 and 2019 editions of the University of the Basque Country Summer Courses (the 2020 course was unfortunately cancelled due to the COVID-19 pandemic) we have contributed with the course **Enfermedades Autoinmunes Sistémicas / Systemic Autoimmune Diseases**. It has been conceived as a practical and presential course, remarking the importance of a collaborative multidisciplinary approach and including real-life clinical situations from our two Units with an interactive approach.

## Objectives

Update the diagnostic process and clinical management of the different SAD.

To remark the importance of multidisciplinary team work.

To discuss with the attendants real-life clinical cases with an eminently practical approach.
