Description

Specific Topics of the conference:

- Approaches measuring contributions and impacts of companies to a CE
- Innovations for indicators, composite sustainability indexes and multidimensional measurement approaches to CE development in practice
- Analyses of how CE approaches of companies contribute to an economy 'operating in the safe space of planetary boundaries' or to the UN Sustainable Development Goals
- Proposals for approaches to measure and manage CE contributions in the supply chain
- Impacts of CE innovations on developing business cases and on corporate financial performance
- The role of CE accounting, performance measurement and reporting

Traditional EMAN Topics:

- Sustainability management and measurement tools for management control
- Sustainability (Integrated) reporting and accounting
- Social entrepreneurship, sustainable entrepreneurship and sustainability performance
- Sustainable Supply Chain Management
- Material and energy flow accounting
- Water, forest, biodiversity accounting and sustainability of business
- Life Cycle Assessment for Innovations
- Incorporating Sustainability competences in Higher Education Institutions
- Others traditionally accepted in EMAN conferences
