Description

Systemic autoimmune diseases (SAD) continue to be a big challenge for clinicians, given their complexity, clinical variability and potential impact in the life of patients, many of them young women.

Over the last 8 years, the Autoimmune Diseases Units from Cruces and Bordeaux University Hospitals have established a collaborative clinical and research program, including joined Lupus-Cruces and Lupus-Bordeaux research projects and annual Basque Lupus Seminars at Baiona.

In the 2018, 2019, 2021 and 2022 editions of the University of the Basque Country Summer Courses at Donostia (the 2020 course was unfortunately cancelled due to the COVID-19 pandemic) we have contributed with the course **Enfermedades Autoinmunes Sistémicas / Systemic Autoimmune Diseases**. It has been conceived as a practical course, remarking the importance of a collaborative multidisciplinary approach and including real-life clinical situations from our two Units with an interactive approach.

This proposal for the 2023 edition follows the same scheme than the previous courses, with agile round tables, short and frequent breaks and plenty of room for debate among speakers and assistants. As in previous editions, we include a section of clinical images and another of challenging clinical case presentation and discussion based on daily practise, with the aim of stimulating the participation of attendees.

Objectives

To update the diagnostic process and clinical management of the different SAD.

To remark the importance of multidisciplinary team work.

To discuss with the attendants real-life clinical cases with an eminently practical approach.

In collaboration with

Christophe Richez

Christophe Richez, MD, PhD, works in the Rheumatology Department at Hôpital Pellegrin and is affiliated with the Immuno ConcEpT Lab CNRS UMR 5164 at the University of Bordeaux, Bordeaux, France. He is Head of the National Reference Center RESO for rare autoimmune systemic diseases, and the Club Rhumatismes et Inflammation. His main research interests are translational research on the role of different actors, such as selectins, Tfh, Tph and others, in the pathogenesis of systemic lupus erythematosus. His clinical research focuses on treatment strategy in rheumatoid arthritis (RA), notably with 2 ongoing clinical trials on combination of metformine and methotrexate in early RA, and combination of baricitinib and adalimumab in refractory RA. Professor Richez is a member of the scientific committee of major French rheumatology societies including the Société Française de Rhumatologie, FAI2R, GR2, and Fondation Arthritis. He is also member of the steering committee of the ERN ReCONNET.
