Description

The 28th Conference of the Parties (COP28) of the United Nations to combat climate change was held between 30 November and 13 December 2023 in Dubai (United Arab Emirates). The summit was a key meeting since, among other things, it was to approve the first global stocktaking that should analyse where we are, and what the main needs are and identify solutions to advance towards the objectives of the Paris Agreement.

After two weeks of difficult negotiations, the COP28 culminated with the approval of the first global stocktaking, but also of other key issues such as the global target on adaptation, the implementation of the fund to address the losses and damages of the most vulnerable countries or the work package on just transition.

This seminar will explore the main results of the Dubai summit, as well as the key issues that we can expect in the future with the help of María José Sanz, scientific director of the Basque Centre for Climate Change, BC3.

Objectives

Program

01-02-2024

18:00 - 18:30 Lecture

María José Sanz Sánchez | BC3 - Directora Científica. BC3

18:30 - 19:15 El divulgador científico Guillermo Roa mantendrá un diálogo con la ponente una vez finalizada la conferencia / Guillermo Roa zientzia dibulgetzaileak hizlariarekin elkarrizketa izango du hitzaldia amaitutakoan

Teachers

María José Sanz Sánchez

BC3, Basque Centre for Climate Change, Scientific Director

Ikerbasque Professor and Scientific Director of the Basque Centre for Climate Change (2016-). She graduated at University of Valencia and post-doct in the Arizona State University. She has worked on research and research-policy at national and international level. She has also worked at Mediterranean Center for Environmental Studies (CEAM) until 2007. She was Senior Officer positions at the secretariat of the UNFCCC supporting climate change negotiations (2007-2011), and at FAO as Program Coordinator of the UNREDD Programme (2012-2015). She held the High Distinction for Scientific Merit of the Generalitat Valenciana (2019). Dr. Sanz has worked extensively on air pollution and climate change and environment issues for 30 years. She has published over 150 scientific papers, among other in Nature, Nature Climate Change and PNAS, and is recognized as an expert in land use and climate change issues. She has been an advisor to and collaborated with many national and international organizations (World Bank, UNDP, UNEP, UNFCCC secretariat, Meridian Institute, the European Commission, the Green Climate Fund and the governments of Spain), and several of its regional governments, Japan, US, and several developing country governments.
