Description

The 2DSPM has been consolidated in a biennial basis conference, celebrating in 2024 its third edition.

In 2D materials, essentially everything takes place on the surface and, consequently, SPM techniques have produced some of the most exciting works in these unique materials. We believe a focused 2DSPM conference will represent a very stimulating environment facilitating the easy flow of knowledge and ideas among participants. In this 2024 edition, we will have 23 invited speakers and additional participants who will contribute with short talks and posters.
