Organising Committee

Description

The fifteenth edition of the International Conference on Energy Efficiency and Sustainability in Architecture and Urbanism (EESAP 15) will address the theme of «Co-creation for a better habitat».

Co-creation is a term that is not yet included in the RAE (Spanish Royal Academy of the Spanish Language), however, the use of the term has already acquired maximum relevance in different professional fields and has been applied for some time to the collaborative development of concepts, solutions, products or services.

Of course, it is identified as a methodology that will allow us to face with resilience and greater success the processes of ecological, social and technological transition in which our society is immersed.

The collective habitat construction, understanding HABITAT in all its scales, from land, urban to building, will help us (or at least bring us closer) to guaranteeing the quality of life for all people, as well as a fair climate neutrality achievement.

We would like to structure the contributions around this new way of building habitat and this multi-scale approach in relation to the following four thematic lines: sustainable mobility, green infrastructure, circular economy and social innovation, considering co-creation as a fundamental aspect in the design of built space both in architecture and in the city and land. These 4 lines are addressed by the application of the principle of equality of women and men in all research work, in line with the new European guidelines.

Contributions can be about concrete experiences, good practices, methodologies, methodological explorations or diverse opportunities that contribute to enriching knowledge and promoting collaboration in the creation of more sustainable habitats. These opportunities will have to guarantee equal access to resources and rights for women and men and, through them, for all people in disadvantaged conditions.

Sustainable mobility:

Exploring accessible and environmentally friendly public transport strategies and how their implementation can improve the quality of life in cities through a collaborative approach that involves the community in design and decision-making.

Green infrastructure:

Analysing the impact of the integration of green spaces in urban settings in terms of health, well-being and environmental sustainability, considering the active participation of people in the planning and creation of these spaces in order to leave no one behind.

Circular economy:

Identifying opportunities for the reduction, reuse and recycling of resources in the design and construction of habitable environments, promoting efficiency and sustainability through co-creation processes involving different actors and local communities.

Social innovation:

Exploring how citizen participation and collaboration between different groups can contribute to the inclusive creation, resilient and sustainable communities at all levels of habitat, encouraging co-creation in the design of built space as a medium for empowerment and social cohesion.

Furthermore, since this 2024 edition, gender mainstreaming has been included as an innovative factor. This responds to the change that, from 2020, is proposed by the European Commission, which defines and adopts the EU strategy on gender equality, which presents political objectives and initiatives to make significant progress towards a Europe with gender equality by 2025. In this framework, the 4 thematic lines are an opportunity to mark this path. Innovation also means talking about the mobility of care, guaranteeing and ensuring the active participation of women as bearers of different and often invisible knowledge, in order to build architectural and urban spaces that, leaving behind their presumption of neutrality, guarantee equal access to resources and to the spaces themselves, and that respond to needs that are not normative, but more everyday and differentiated.

In view of this new debate, we invite all our regular collaborators and those who would like to join us in the next edition of our congress to present their ideas and reflections. As in previous editions, and given

the congress R+D+i, it is especially aimed at professionals, researchers and students.

Since the EESAP8/CICA1 edition, the conference has extended the scope of scientific and technical diffusion to the entire innovative construction sector. Furthermore, it is opened to the business sector, due to their close relationship to meet current social demands on business innovation for achieving a higher quality of life.

Since the EESAP8/CICA1 edition, the conference has extended the scope of scientific and technical diffusion to the entire innovative construction sector. Furthermore, it is opened to the business sector, due to their close relationship to meet current social demands on business innovation for achieving a higher quality of life.

Objectives

- To discuss the opportunities generated by new models that are greener, digital, resilient and better adapted to current and future challenges.
- To achieve a strategic confluence of training-research-production.
- Linking construction industry players to increase competitiveness by applying new technologies in activities where diffuse but broad expertise is required. Create collaborative business environments.

ABSTRACT SUBMISSION

The Organising Committee encourages and invites researchers or professionals who are specialized in any of the proposed topics to submit their proposals for the oral presentation or poster sessions according to the following rules:

1. In case the abstract is accepted, the first author (or anybody who might defend the communication), **will have 15 days to formalize the registration for the conference**. If the registration is not done within that period, the research work will not be listed in the publication nor presented in the conference.
2. At least one of the authors of the oral communication or poster must be registered for the conference. The certificate/s will only be issued for the registered author/s.
3. The abstract should be written according to the [official template](#). No other formats will be accepted. The style and extension rules that are detailed in the document should be followed. The template can be downloaded on this website, which is valid for both oral communications and posters.
4. Language. **The abstract should be written in English**. If the abstract is accepted, the full paper communication should be written in both languages, that is, English and Spanish and in any case with non-sexist and non-androcentric language.
5. Abstracts, papers and presentations will be required to use non-sexist and non-androcentric language and images. The scientific and organising committee reserves the right to request changes in this regard.
6. Once the research works are submitted, there is no option to modify them..
7. The abstract must be sent to eesap.caviar@ehu.eus email address. The subject of the email has to include the name of the conference EESAP15 followed by the main author's name as shown in the example. Example: "EESAP15 MARIA PEREZ GONZALEZ".
8. No other submitting procedure, after deadline, or documents not following the above-mentioned rules will be accepted.

ABSTRACT AND FULL PAPER SUBMISSION

MARCH - APRIL 2024 Call for papers.

20th APRIL 2024 Deadline for abstract submission

3rd MAY 2024 Notification of abstract acceptance

19th JUNE 2024 Deadline for Full paper/poster submission

17th JULY 2024 Notification of full paper /poster acceptance

11th SEPTEMBER 2024 Deadline for sending the final version of full paper/poster

25th SEPTEMBER 2024 Deadline for receipt of presentation in .ppt or .pdf format

22-23rd OCTOBER 2024 CONFERENCE

Rufino Javier Hernández Minguillón

UPV/EHU, Arquitectura

PhD Architect UNAV (1991), Master in Building UNAV (1993), lecturer at the ETSA-UNAV (1984 and 2003), lecturer at the UPV/EHU (since 1997), Professor (2020). ANECA and ANEP assessor in the area of Civil Engineering and Architecture. Founder of the architectural firm AH Asociados. Member of the board of directors of the Basque Construction Cluster ERAIKUNE (2013-) and vice-president (2013-2016). Director of the Master Degree in Sustainable Construction and Energy Efficiency (UPV/EHU). Member of the Academic Committee of the University Master Degree in Energy Efficiency and Sustainability in Industry, Transport, Building and Urban Planning (UPV/EHU). Director of the Master Degree in Advanced Construction (UPV/EHU). Head of CAVIAR Research Group, IT1135-16 (UPV/EHU). Researcher in: eco-efficient industrialised construction, inclusive eco-efficient urban planning, smart architecture and urban planning.

Izaskun Aseguinolaza Braga

UPV/EHU

Se graduó como arquitecta en la ETS de Arquitectura de la Universidad de Navarra donde defendió su tesis “La Dimensión Arquitectónica en el Origen del Planning Británico” en 2007. Durante varios años fue profesora de las asignaturas de Planeamiento Urbano I y II en la especialidad de Planeamiento y Desarrollo Urbano de la ETSAUN. Actualmente es Profesora Adjunta del Área de Urbanística y Ordenación del Territorio del Departamento de Arquitectura de la UPV/EHU donde imparte asignaturas en relación con el urbanismo y la gestión urbanística. Además, compagina la docencia con las labores de gestión en la Subdirección de Cultura, Alumnado y Euskara de la Escuela de Arquitectura de la UPV/EHU.
