

# Climate Emergency and Global Paediatric Health

We are aware that the climate emergency is already directly impacting our lives. We should also be aware that it is affecting and will affect our health as well; and that children will suffer the worst consequences, particularly those who are born today in the poorest countries.

## Teachers

### **Quique Bassat Orellana**

Doctor, specialised in Paediatrics, Tropical Medicine and Epidemiology

---

Doctor, specialised in Paediatrics (Barcelona 2004), Tropical Medicine (Barcelona University, 2004) and Epidemiology (London School of Tropical Medicine and Hygiene, London 2007-08). Doctorate (PhD) in Medicine from Barcelona University (Title: “Malaria in the paediatric wards of a rural Mozambican hospital and the clinical development of new antimalarial drugs”, Barcelona, 2009). ICREA Research Professor (since 2017) at the Barcelona Institute of Global Health (ISGlobal). General Manager of the Barcelona Institute of Global Health (ISGlobal), since January 2024. As a paediatrician, with special interest in the epidemiology of infectious diseases and global public health, I have always sought to combine my clinical work with biomedical research into those diseases that most affect the most vulnerable.
