Description

Los cuidados paliativos nos demuestran que podemos cuidar cuando no se puede curar. Que incluso cuando la vida misma corre un peligro de muerte, podemos fortalecerla y cuidarla. Los cuidados paliativos, en momentos tan duros por los que nadie quiere pasar, nos ofrecen protección, capacidad para responder a diferentes tipos de dolor y necesidades, y una gran profesionalidad.

Pero este derecho que se nos ofrece por ley, es muy desconocido para la ciudadanía. También es a menudo desconocida en la formación de profesionales sanitarios y en las organizaciones sanitarias. Y si atendemos al cuidado infantil, los cuidados paliativos pediátricos aún están por desarrollar en la Comunidad Autónoma del País Vasco. Estamos convencidas y convencidos que el desarrollo de cuidados paliativos nos fortalecerá y humanizará como sociedad, evitando muchos sufrimientos evitables.

El objetivo de este Curso de Verano es difundir el conocimiento sobre los cuidados paliativos en la sociedad y dar a conocer nuestro derecho como ciudadanas y ciudadanos. Se reunirán las experiencias de personas que han podido conocer el servicio de los cuidados paliativos, tanto en la infancia como en la edad adulta, con el conocimiento de profesionales expertos en cuidados paliativos. Y a través de todos estos puntos de vista, se informará de los beneficios que traerá el desarrollo de los cuidados paliativos.

Objectives

Difundir los derechos que tiene la ciudadanía a recibir cuidados paliativos.

Informar sobre la necesidad de prestación de cuidados paliativos infantiles.

Reflexionar sobre la estructura organizativa territorial de los cuidados paliativos.
