Spanish Conference on Nanophotonics (Conferencia Española de Nanofotónica) - CEN2018

03.Oct - 05.Oct

Cod. Z10-18

Edition
2018

Activity type
Congress

Date
03.Oct - 05.Oct

Location
Centro Carlos Santamaria

Languages
English

Academic Validity
30 hours

Web
http://cen2018.dipc.org

MANAGEMENT

Juan José Saénz Gutiérrez, DIPC

Aitzol Garcia Etxarri, DIPC
Organising Committee
Description

The conference aspires to address a wide range of topics related to nanophotonics, metamaterials and subwavelength optics. Topics will include all aspects of research, ranging from fundamental science to fabrication and applications. Special sessions will be devoted to emerging fields of research such as Quantum Nano-optics, spin-orbit coupling of light and topological photonics to mention a few.

CEN2018 will take place in Donostia-San Sebastián during October 3-5, 2018 following the spirit initiated by the first five editions of the Spanish Nanophotonics Conference held respectively in Tarragona (2008), Segovia (2010), Carmona-Sevilla (2012), Santander (2014) and Valencia (2016). The Conference aims to gather all the groups carrying out research in Nanophotonics in Spain (as well as somewhere else with interest in the research in Nanophotonics performed here). It intends to spread the research results achieved by all the different Spanish groups and to promote the establishment or reinforcement of contacts between them, as a mean to help the community to become more visible and dynamic.

The Conference will be organized in thematic sessions composed of plenary, keynote and invited talks as well as contributed scientific communications (oral and poster). For a wider diffusion, contributions must be in English with the proposed format.

Organizing committee:
Javier Aizpurua, Research Professor, CFM-CSIC
Rubén Esteban, Ikerbasque Fellow, DIPC
Luis Liz-Marzán, Ikerbasque Professor, Biomagune
Gabriel Molina-Terriza, Ikerbasque Professor, CFM-CSIC
Aitzol García-Etxarri, Gipuzkoa Fellow, DIPC (Chair)
Juan José Sáenz, Ikerbasque Professor, DIPC (Chair)

Objectives

To present a broad range of current research in Nanophotonics worldwide as well as related policies of interest.

To gather all the groups carrying out research in Nanophotonics in Spain.

To spread the research results achieved by all the different Spanish groups.

To promote the establishment or reinforcement of contacts between them, as a mean to help the community to become more visible and dynamic.

To provide a platform where young researchers can present their latest work and also interact with high-level scientists.
