Descripción

In 2D materials, essentially everything takes place on the surface and, consequently, SPM techniques have produced some of the most exciting works in these unique materials. We believe a focused 2DSPM conference will represent a very stimulating environment facilitating the easy flow of knowledge and ideas among participants. After the success of the first edition, 2DSPM has been consolidated in a biennial basis conference. In this 2022 edition, we will have 26 invited speakers and additional participants who will contribute with short talks and posters.
