Descripción

Sweeteners and their use in food processing and for health purposes is a subject generating nowadays big controversia, mainly because the real effects of the use of Sweeteners and Swetness enhancers on health are still unknown. In addition, the regulatory framework and consumers's perceptions of sweeteners and the use of these food ingredients is also under development. Given these premises, the EU funded the SWEET consortium, with the main aim of identifying and addressing the barriers and facilitators to the use of sweeteners and sweetness enhancers (S&SEs), as well as to examining the risks and benefits of using S&SEs to replace sugar in the diet in the contexts of health, obesity, safety and sustainability.

This Summer Course will serve as a channel for communicating to scientists, health professionals and general public the new findings on the use, acceptance and barriers within S&SEs use.

Objetivos

To offer the last updates on sweeteners research on health and weight management. How their use may help to maintain good health indicators or weight control.

To inform patients and caregivers on how sweeteners may affect appetite, microbiota and other metabolic factors.

To explain how food technology is integrating the use of S&SEs in foods, and the origin of this S&SEs, either plant-based or artificial.

To widen the knowledge of consumers' perceptions, barriers and facilitators for the use of S&SEs, as well as to give light to regulatory aspects and dissemination strategies.

Santiago Navas Carretero

Universidad de Navarra, Investigador

Santiago Navas-Carretero se licenció en Farmacia por la Universidad Complutense de Madrid en 2002, y se doctoró en Nutrición en 2007 por esta misma Universidad, recibiendo además la mención “Doctor Europeus”. Se incorporó a la Universidad de Navarra en Octubre de 2008 y desde entonces lleva realizando sus labores de investigación en dicho Centro. Es investigador en el Centro de Investigación en Nutrición de la Universidad de Navarra. Es Investigador Principal de 2 contratos de investigación (Nutriprecisión y Medkids), 2 proyectos de Gobierno de Navarra (ALINFA y CORALS-centros educativos), además de haber participado en numerosos proyectos de nivel regional, nacional y europeo. Cabe destacar los proyectos europeos Food4Me, PREVIEW y SWEET. Además, es autor o coautor de 120 artículos científicos y capítulos de libros.

Monique Raats

University of Surrey, Professor

Professor Monique Raats is Director of the University of Surrey's Food, Consumer Behaviour and Health (FCBH) Research Centre. FCBH research domains include: food-related behaviour and policy interventions (such as labelling, health claims) to achieve sustainable and healthy lifestyles; social, policy and ethical issues relevant to the grand societal challenges such as sustainability and obesity; study of food systems from the perspective of significant actors and stakeholders within the system; methodologically advancing the field of food consumer science through exploring novel sources of data and methods of data linking. She previously worked at the Institute of Food Research, Health Education Authority and University of Oxford. Her expertise is in the area of public health and behavioural nutrition research, gained on a variety of projects. Her research is wide ranging both in terms of topics covered (e.g. food choice, policy development, food safety) and methodologies used (e.g. qualitative, quantitative, stakeholder consultation). To date she has published over 140 refereed papers, other publications including 20 book chapters and edited two books ("The Psychology of Food Choice" and "Food for the Ag(e)ing Population").

James Suckling

University of Surrey

Dr James Suckling is a Research Fellow at the Centre for Environment and Sustainability, within the University of Surrey, UK. He trained as a physicist, before working for 6 years in R&D at Sharp. He has worked in sustainability for 6 years and researched diverse topics including circular economy models for mobile phones, up-scaling of niche innovations in the water-energy-food nexus, rearing insects for food and feed, and upscaling of smart local energy systems. All his research in CES has had a multi-disciplinary focus, including technical and social aspects throughout. He has expertise in life cycle assessment. His latest role is on the EU Horizon 2020 funded SWEET Project, researching the sustainability of replacing sugar with sweeteners and sweetness enhancers in food and drink.
