**Antolakuntza Batzordea**

**COURSE**  
Molecular approaches, methods and techniques in animal ecology  
Miramar Palace, Donostia  
28-30 July 2017

**TARGET STUDENTS:**  
Undergrads, MSc and PhD students, researchers and lecturers working on animal ecology with basic knowledge on molecular techniques.

**INTENSIVE COURSE | 24h**  
Introduction to molecular ecology (experimental design)  
General techniques (library build, sequencing platforms...)  
Whole genome SNP analysis (population genetics)  
DNA metabarcoding (diet analysis)  
Shotgun metagenomics (functional microbiome profiling)  
One-by-one sessions

Registration open till May 31st or till reaching student limit (40)

**Regular fee: 250€**  
**EBRS attendees fee: 100€**  
**Exceptional fee: 200€**  
Students without financial support  
Private citizens (contact: [info@ebs2017.eu](mailto:info@ebs2017.eu))

**Registration and further information:**

Gipuzkoako Foru Aldundia  
Diputación Foral de Gipuzkoa

## **Azalpena**

Molecular ecology comprises a wide diversity of genetic-based methodological and technical approaches to address ecological and evolutionary questions. This course will focus on general concepts, current techniques and key aspects for the experimental design of molecular studies applied to animal ecology using bats as model species. Particularly, the course will go into detail about population genomics, DNA metabarcoding for diet studies and shotgun metagenomics applied to gut microbiota.

## Zuzendaritza

### **Aitor Arrizabalaga**

UPV/EHU University of the Basque Country

---

Aitor is a postdoctoral researcher at the University of the Basque Country, UPV/EHU. His research is focused on the foraging ecology of bats using DNA metabarcoding: from individual-level trophic specialization to interspecific trophic interactions and pest control services.

### **Antton Alberdi**

University of Copenhagen

---

Antton is a postdoctoral researcher at the Natural History Museum of Denmark, where he researches on bat, cervid and bird gut metagenomes from modern and ancient guano samples using full shotgun techniques.
