Description

The goal of the workshop is to explore novel directions in the field of exciton transport and associated exciton scattering phenomena in van der Waals 2D semiconductors.

We wish to bring together experts from experiment and theory, to encourage exchange of ideas and identify emerging questions for future research.

For participation and poster abstract submission, please fill in the form in the link below:

[APPLICATION FORM](#)

Please note that the number of participants is limited.

Objectifs

The main topics will be focused on both measurements of exciton propagation and relevant theoretical descriptions in monolayer semiconductors, heterostructures, and 2D perovskites. These will further cover closely related phenomena, such as exciton coupling to free electrons, phonons and other excitons, as well as the role of external fields in exciton transport. Of particular relevance will be the role of structural modifications such as atomic defects, superlattices, and local reconstruction in heterostructures.

Collaborateurs spécifiques au cours

Programme

The workshop will begin on Tuesday, May 30 in the afternoon, and end on Friday, June 2 at noon. A preliminary schedule is enclosed.

Speakers include:

Timothy Berkelbach, Columbia University

Rudolf Bratschitsch, University of Münster

Paulo Eduardo de Faria Junior, University of Regensburg

Milan Delor, Columbia University

Mikhail Glazov, Ioffe Institute

Alexander Högele, LMU

Felipe da Jornada, Stanford University

Christoph Kastl, TU Munich

Aaron Kelly, MPSD Hamburg

Ermin Malic, Philipps-Universität Marburg

Andrés Montoya-Castillo, University of Colorado Boulder

Fulvio Paleari, CNR-ISM, Italy

Paulina Plochocka, CNRS Toulouse / Wroclaw

Ferry Prins, Universidad Autonoma de Madrid

Diana Qiu, Yale University

Ronen Rapaport, Hebrew University

Alexander Steinhoff, University of Bremen

Ursula Wurstbauer, University of Münster

Danielle Sanvitto, CNR NANOTEC, Lecce, Italy

William Tisdale, MIT

Dmitry Efimkin, Monash University

Andras Kis, EPFL

Parag Deotare, University of Michigan

Leonid Butov, University of California San Diego

Richard Schmidt, Heidelberg University

Laurent Lombez, CNRS Toulouse

Akshay Rao, University of Cambridge

Pina Romaniello, CNRS Toulouse

Directed by

Alexey Chernikov
