Description

The year 2022 marks the centenary of the foundation of the International Union for Pure and Applied Physics (IUPAP). As part of the celebrations of this anniversary, the IUPAP sponsors the organization of an academic workshop and the production of an academic volume on the history of the IUPAP, broadly construed. Topics include: the role of the IUPAP in the development of physics, the connections between science and diplomacy in the work of the IUPAP, the internationalization of physics through the 20th century, the relationship and definitions of pure and applied physics within the activities of the IUPAP, the relation between global and local actions of IUPAP officers and committees, the construction of the network of international organizations in the natural sciences, etc.

Objectifs

This workshop is part of the centennary of the IUPAP celebrations. The papers discussed during this workshop are preliminary versions of the chapters of an edited volume to appear in 2023 in Oxford University Press.

Collaborateurs spécifiques au cours

Directed by

Jaume Navarro ---

Ikerbasque and UPV/EHU

Jaume Navarro is Ikerbasque Research Professor at the University of the Basque Country. He has worked extensively on the history of 19th and 20th century physics and is author, among others, of A History of the Electron (Cambridge, 2012), and editor of Research and Pedagogy: A history of Quantum Physics through its Textbooks (Berlin, 2013) and Ether and Modernity: The recalcitrance of an epistemic object (Oxford, 2018).
