

ADDITIVE MANUFACTURING Conference 2025

1ST EDITION

Conference Series on Additive Manufacturing of Soft Materials

6-10 October 2025 / San Sebastián, Spain

Universidad
del País Vasco

Euskal Herriko
Unibertsitatea

POLYMAT

ASU Arizona State
University

UNIVERSITÄT
HEIDELBERG
ZUKUNFT
SEIT 1386

ORGANIZING

GOLDEN

SILVER

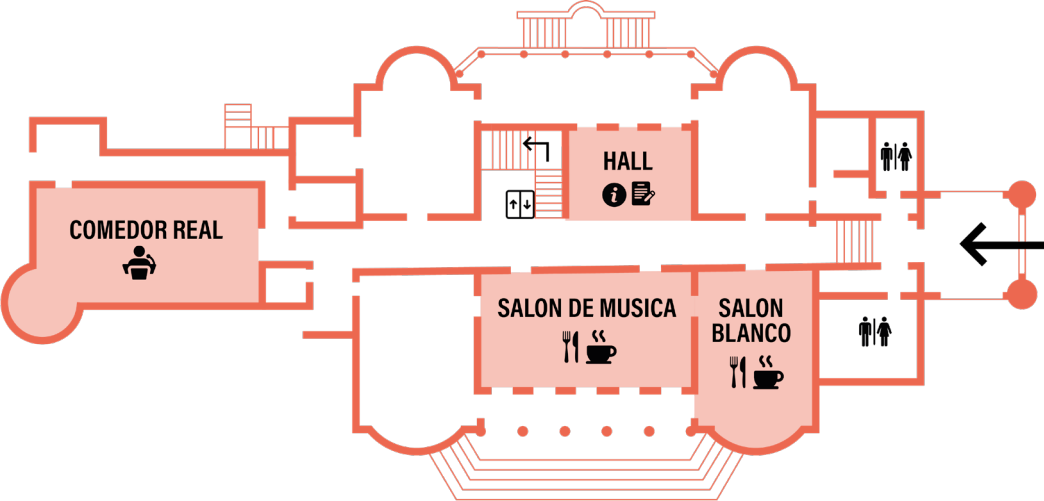

SPONSORS

PALACIO DE MIRAMAR

GROUND FLOOR

FIRST FLOOR

MAIN EVENTS

Young Researchers Symposium / 6th October 2025 / **Centro Carlos Santamaria**

Young Social Beer / Monday 6th October 2025 / **Bidassoa Basque Brewery**

Main Conference / 7th-10th October 2025 / **Palacio Miramar**

Welcome Cocktail and Poster Exhibition / Tuesday 7th October 2025, 18:00

Social Activities / Wednesday 8th October 2025, 18:30

Gala Dinner / Thursday 9th October 2025, 20:00 / **Ténis Ondarreta**

Award Cerimony & Final Remarks / Friday 10th October 2025, 12:15

MAIN PLACES

Centro Carlos Santamaria / Universidad del Pais Vasco/Euskal Herriko Unibertsitatea, Pl. de Elhuyar, 2, 20018 Donostia

Cafetería Gureak / Pl. de Elhuyar, 20018 Donostia

Palacio de Miramar / Palacio de Miramar, Paseo Miraconcha, 48, 20007 Donostia

Bidassoa Basque Brewery / Usandizaga Kalea, 23, 20002 Donostia

Ténis Ondarreta / Eduardo Chillida Pasealekua, 9, 20008 Donostia

USEFUL INFORMATION

Wi-fi / name: MIRAMAR / password: miramar1893

Mount Ulia

Zurriola Beach

Auditorio Kursaal

★ Eizassoa
Basque Brewery

Old Town

City Centre

Mount Urgull

Santa Clara Island

Mount Igeldo
Park

★ Tennis Restaurant

Ondarreta Beach

La Concha Beach

★ Miramar Palace

★ Centro Carlos Santa Maria

★ Cafeteria Gureak

08:30
/09:15

Registration
Centro Carlos Santamaria - Main Hall

09:15
/09:25

Introduction
Auditorium

Timothy Long / Arizona State University

Xabi Lopez de Pariza / University of the Basque Country

09:25
/10:10

Plenary session
Timothy Long / Arizona State University

Focusing a Sustainability Lens on Additive Manufacturing: Asking More from Science and Engineering

Young Researchers Symposium

Auditorium

Chair: **Xabi Lopez de Pariza** / University of the Basque Country

10:15
/11:35

Teresa Carranza
/ University of the Basque Country (UPV/EHU)
Gallic Acid as a Green Crosslinker for Gelatin 3D Printed Scaffolds

10:35
/10:55

Chengzhi Li
/ Albert-Ludwigs-Universität Freiburg
3D Printed Elastic Fluoropolymer with High Stretchability and Enhanced Chemical Resistance for Microfluidic Applications

10:55
/11:15

Johannes Markhart
/ Heidelberg University
New Programmable Polymers for Light-Based 4D Printing

11:15
/11:45

Coffee Break
Sala Txillardegui

11:45
/12:05

Anthony Kever
/ University of Mons (UMONS)
3D-Printed Drug-Eluting Implants for the Treatment of Periodontitis

12:05
/12:25

Ander Leiza Balda
/ University of the Basque Country (UPV/EHU)
Standardizing Light: A Modular Photoreactor for Controlled, Reproducible and High-Throughput Photochemical Reactions

12:25
/12:45

Gabriel Größbacher
/ University Medical Center Utrecht
Near Infrared Tomography for Density Based Adaptive Context-Aware Volumetric Printing

12:45
/13:05

Sebastián Locatelli
/ Consejo Nacional de Investigaciones Científicas y Técnicas-CONICET-Argentina
3D-Printable Biobased Eutectogels Derived from Soybean Oil and Natural Deep Eutectic Solvents for Underwater Electromyography Recording

13:05
/14:30

Lunch Break
Gureak Cafeteria

Young Researchers Symposium

Auditorium

Chair: **Samantha Catt** / University of Heidelberg

14:30
/15:00

Keynote
Jolke Perelaer
/ Wiley-VCH

Scientific Publishing in Wiley's Advanced journals

15:00
/15:20

Elizabeth Recker
/ University of Texas at Austin

Wavelength-Selective One-Pot Multimaterial DLP 3D Printing

15:20
/15:40

Marina León-Calero
/ Institute of Polymer Science and Technology (ICTP-CSIC)

Conductive TPS for Pellet-Based 3D Printing: Processing, Characterization and Sensor Application

15:40
/16:10

Coffee Break
Sala Txillardegui

16:10
/16:30

Ana María Muñoz Mateo
/ Polymat

Development of GelMa-based bioink for bacterial detection

16:30
/16:50

Yiming Ji
/ EPFL

Volumetric Additive Manufacturing of Composites via Hydrogel Infusion

16:50
/17:10

Lara Rodriguez
/ CICbiomaGUNE

3D printable CNT scaffolds for neuronal tissue engineering

17:10
/17:30

Niklas Schwegler
/ Heidelberg University

Reversible coiled-coil peptide functionalization of 3D-microprinted hydrogels

17:30
/17:45

Conclusion Remarks
Auditorium

Timothy Long / Arizona State University

Xabi Lopez de Pariza / University of the Basque Country

19:00

Young Social Aperitivo
Bidassoa Tap Room

Bidassoa Basque Brewery / Usandizaga Kalea, 23, 20002 Donostia

Please come at the event with your badge.

Each participant will have 2 coupons: with one coupon you can have a beer, with two you can have a cocktail. You are free to use them as you wish.

08:15
/09:00

Registration
Palacio Miramar - Main Hall

09:00
/09:15

Introduction
Sala Julio Carlo Baroja

Haritz Sardon / University of the Basque Country

Timothy Long / Arizona State University

Eva Blasco / University of Heidelberg

09:15
/10:00

Plenary session
Sandra Van Vlierberghe / Ghent University

Sala Julio Carlo Baroja

Chair: **Haritz Sardon** / University of the Basque Country

Light-Based 3D Printing of Tunable Thiol-Ene Polymers: From Submicron Precision to Rapid Fabrication of Biodegradable Implant

Session 1
Sala Julio Carlo Baroja

Chair: **Qin Xiao-Hua** / ETH Zurich

10:05
/10:35

Keynote
Dorleta Jimenez de Aberasturi
/ CIC biomaGUNE

Biofunctional Resins for 4d Printing and Their Application in Vitro Model Design

10:35
/10:50

Disha Bandyopadhyay
/ EPFL

Self-Healing Polymers for Reconfigurable Architected Materials

10:50
/11:20

Coffee Break
Salón de Música & Salón Blanco

11:20
/11:50

Keynote
Riccardo Levato
/ Utrecht University

Light-based Volumetric Bioprinting and Imaging-Driven Manufacturing: Shining a New Light on Engineered Tissues and Organoids

11:50
/12:05

Alejandro Müller
/ Elsevier
Annual Awards for European Polymer Scientists sponsored by the journal POLYMER (Elsevier)

10:05
/10:35

Keynote
Katrien Bernaerts
/ Maastricht University

Biobased Photopolymer Resin for 3D Printing Containing Dynamic Imine Bonds for Fast Reprocessability

10:35
/10:50

Margherita Bernero
/ ETH Zurich

Subtractive Two-photon Microprinting of Architected Hydrogels to Guide Cell Network Formation

11:20
/11:50

Keynote
Eva Blasco
/ University of Heidelberg

4D printing with Light: Function Meets Sustainability

11:50
/12:05

Cristian Mendes-Felipe
/ BCMaterials - Basque Center for Materials, Applications and Nanostructures
Sustainable Photoluminescent Materials based on Soybean Oil-Photocurable Inks for Digital Light Processing

15:05
/12:20 **Bo Van Durme**
/ Ghent University
Advanced Fabrication of Thermo-Responsive Scaffolds for Tissue Engineering: Tailored Resin Development and 4D Microprinting

12:20
/12:45 **Invited**
Juan Rodriguez Hernandez
/ Institute of Polymer Science and Technology (ICTP-CSIC)
Designing Polymers for Additive Manufacturing for Biomedical Applications: From Antimicrobial Material to Biomedical Devices

15:05
/12:20 **Fernando Vidal Peña**
/ University of the Basque Country
Advanced strategies for recycling of functional 3D printing materials

12:20
/12:45 **Invited**
Marco Sangermano
/ Politecnico di Torino
Biobased Sustainable 3D-Printable UV-Curable Formulations

12:45
/14:15 **Lunch Break**
Salón de Música & Salón Blanco

14:15
/15:00 **Plenary session**
Martin Wegener / Karlsruhe Institute of Technology (KIT)

Sala Julio Carlo Baroja
Chair: **Eva Blasco** / University of Heidelberg
3D Laser Nanoprinting

Session 3
Sala Julio Carlo Baroja

Chair: **Riccardo Levato** / Utrecht University

15:05
/15:35 **Keynote**
Qin Xiao-Hua
/ ETH Zurich
3D Printed Bone Architectures for Medicine

15:35
/15:50 **Ane Urigoitia-Asua**
/ CIC BiomaGUNE
Engineering dynamic lung models: 4D LCD printing of thermoresponsive alveolar scaffolds

15:50
/16:05 **Viola Sgarminato**
/ EPFL
Volumetric Additive Manufacturing of Complex Constructs For In Vitro Modeling

Session 4
Comedor Real

Chair: **Katrien Bernaerts** / Maastricht University

15:05
/15:35 **Keynote**
Zachariah Page
The University of Texas at Austin
Color- and Dose-Controlled Multimaterial Digital Light Processing 3D Printing

15:35
/15:50 **Pia Klee**
/ Heidelberg University
Tuneable Depolymerisation of Light-Based 3D Printed Structures on the Macro- and Micro-Scale

15:50
/16:05 **Markus Lunzer**
/ UpNano GmbH
Adaptive Resolution two-photon polymerization as mastering tool for nanoimprint lithography for the fabrication of large-area microfluidic devices

16:05
/16:35 **Coffee Break**
Salón de Música & Salón Blanco

Session 5
Sala Julio Carlo BarojaChair: **Dorleta Jimenez de Aberasturi** /
CIC BiomaGUNE16:35
/17:05**Keynote**
Emily Pentzer
/ Texas A&M University*Additive Manufacturing with Triblock Polycarbonates*17:05
/17:20**Riccardo Rizzo**
/ EPFL Lausanne*Tomographic Bioprinting: A Universal Approach for Biomimetic Organs-On-Chip*17:20
/17:35**Astrid Quaak**
/ Ghent University*From Light to Life: Rapid Volumetric 3D-Printing and Real-Time Tracking of Biodegradable Scaffolds.*17:35
/17:50**Agnieszka Sysło**
/ Cracow University of Technology*Development of carbon dot-based photoinitiating systems for 3D printing technologies*17:50
/19:30**Welcome Cocktail and Poster Exhibition**
Salón de Música & Salón Blanco**Session 6**
Comedor RealChair: **Zachariah Page** / University of
Texas at Austin16:35
/17:05**Keynote**
Joanna Ortyl
/ Cracow University of Technology*Water-Soluble Radical Photoinitiators for Microfabricated of 3D Printed Objects*17:05
/17:20**Omaira Arias**
/ BCMaterials - Basque Centre for Materials,
Applications and Nanostructures*Design and Fabrication of Bio-based Materials for Shape Memory 3D Printing*17:20
/17:35**Audrey Laventure**
/ University of Montreal*Exploring phase separation, alignment and molecular organization in 3D printed polymer blends and crosslinked networks*17:35
/17:50**Francesca Perin**
/ POLYMAT, University of the Basque Country*Development of decellularized extracellular matrix bioinks for SLA bioprinting of gastric in vitro models*

08:30
/08:45

Registration
Palacio Miramar - Main Hall

08:45
/09:30

Plenary session
David Mecerreyes / POLYMAT, University of the Basque Country

Sala Julio Carlo Baroja
Chair: **Emily Davidson** / Princeton University
3D Printing of Ionic and Electronic Conductive Polymers

Session 7
Sala Julio Carlo Baroja

Chair: **Johanna Schwartz** / Lowrence Livermore National Laboratory

09:35
/10:00

Invited
Sandra Camarero-Espinosa
/ POLYMAT, University of the Basque Country
From Static to Dynamic: 3D and 4D Printed Materials for Tissue Regeneration

10:00
/10:15

Robert Aguirresarobe
/ POLYMAT, University of the Basque Country
Silica Aerogels by 3D Printing Vat Photopolymerization

10:15
/10:30

Michelas Maxime
/ Institut de Chimie Radicaleire
3D printing via polymerization-induced microphase separation using acrylate macromonomers instead of macroRAFT agents

10:30
/10:55

Invited
Jacques, Lalevée
/ Université de Haute Alsace
New Photoinitiating Systems for High Performance Materials and 3D Printing

10:55
/11:30

Coffee Break & Group Photo
Salón de Música & Salón Blanco, group photo outside

Session 9
Sala Julio Carlo Baroja

Chair: **Emily Pentzer** / Texas A&M University

11:30
/12:00

Keynote
Christopher Williams
/ Virginia Tech
Printing Out of the Box: Making the Impossible by Multi-material, -Modal, -Axis Additive Manufacturing

Session 8
Comedor Real

Chair: **Michael Bortner** / Virginia Tech

09:35
/10:00

Invited
Mark Dadmun
/ University of Tennessee
Tailor Made Polymeric Feedstocks for Powder Bed Fusion

10:00
/10:15

Alodi Pascal
/ POLYMAT, University of the Basque Country
Influence of 3D printing on the electrical properties of conductive nanocomposites

10:15
/10:30

Mercedes Fernandez
/ POLYMAT, University of the Basque Country
Rheological Insight on 3D Printable Dynamic Hydrogels

10:30
/10:55

Invited
Michael Bortner
/ Virginia Tech
Additive Manufacturing for Selective Environmental Remediation

Session 10
Comedor Real

Chair: **Mark Dadmun** / University of Tennessee

11:30
/12:00

Keynote
Katharina Ehrmann
/ TU Wien
Expanding Material Frontiers in 3D Printing via Multi-Material Stereolithography

12:00 /12:15 **Filip Petko**
/ Cracow University of Technology
Stilbene-Based Iodonium Salts as One-Component Photoinitiators with Increased Quantum Yield of Acid Generation for Cationic VPP 3D Printing

12:00 /12:15 **Zdeněk, Veselý**
/ University of West Bohemia
IR thermodiagnosics of FLM process

12:15 /12:30 **Maialen Uribarrena Arrese-Igor**
/ EHU- Euskal Herriko Unibertsitatea
Biocompatible soy protein-based resins for high precision DLP 3D printing in tissue engineering

12:15 /12:30 **Christine Jerome**
/ University of Liege
3D-printing of NIPU biomaterials

12:30 /12:55 **Invited Didier Gigmès**
/ CNRS
Advances in Nitroxide Mediated Photopolymerization : Toward Living 3D Micro and Macro Surface Functionalization

12:30 /12:55 **Invited Yinyin Bao**
/ University of Helsinki
Digital Light 3D Printing of Biodegradable Polymers

12:55 /14:15 **Lunch Break**
Salón de Música & Salón Blanco

Session 11

Sala Julio Carlo Baroja

Chair: **Robert Aguirresarobe** /
University of the Basque Country

14:15 /14:45 **Keynote Callie Higgins**
/ National Institute of Standards and Technology
Cure Depth Dynamics in Photopolymer Resins: Effects of Light Source Bandwidth and Absorber Type

14:45 /15:10 **Invited Antonio Dominguez-Alfaro**
/ Institute of Microelectronics of Sevilla (IMSE-CNM-CSIC)
Shaping The Future of Bioelectronics: Innovation in Materials and Multi-Material 3D Printing

15:10 /15:25 **Alper Balkan**
/ École Polytechnique Fédérale de Lausanne (EPFL)
Light-Assisted Fabrication of Reversible Composites

Session 12 - Industrial

Comedor Real

Chair: **Timothy Long** / Arizona
University

14:15 /14:35 **Invited Ivan Sardon Barbero**
/ Indart3D
Pellet-Based Additive Manufacturing: Sustainability and Performance

14:35 /14:55 **Invited Jorge Madrid-Wolff**
/ Readily3D SA
Advanced Tomographic Printing: Enhancing (bio)fabrication with machine vision and high-throughput technologies

14:55 /15:15 **Invited Xabi Lopez de Pariza**
/ Hevea3D
Breaking the Mold: Advanced Additive Manufacturing Solutions

15:15 /15:35 **Invited Subin Damodaran**
/ Tosoh Bioscience GmbH
Gel Permeation Chromatography: A Tool to Monitor the Degradation Kinetics of Polymers and Additives

15:25 /15:50	Invited Andreas Heise / RCSI <i>3D Printing with Polypeptides</i>	15:35 /15:55	Invited Benjamin Richter / Nanoscribe GmbH & Co. KG <i>Revolutionizing Biomedical Fabrication: Two-Photon Polymerization for Multimaterial 3D Printing</i>
-----------------	---	-----------------	--

15:50 /16:20	Coffee Break Salón de Música & Salón Blanco
-----------------	---

Session 13 Sala Julio Carlo Baroja Chair: Katharina Ehrmann / TU Wien		Session 14 - Industrial Comedor Real Chair: Xabi Lopez de Pariza / Hevea 3D	
16:20 /16:50	Keynote Johanna Schwartz / Lawrence Livermore National Laboratory <i>Advancing chemistries of additive manufacturing: Ongoing efforts at Lawrence Livermore National Laboratory</i>	16:20 /16:40	Invited Markus Lunzer / UpNano GmbH <i>2-Photon Polymerization – A Versatile Microfabrication Technology for Scientific Challenges from the Nano to the Macro Scale</i>
16:50 /17:15	Invited Josh Worch / Virginia Tech <i>Closed-loop biogenic resins for sustainable additive manufacturing</i>	16:40 /17:00	Invited Jasper Van Hoorick / Biolnx BV <i>From Ligth to Life: BIO INKS as a key to biofabrication for multiple printing technologies</i>
		17:00 /17:20	Invited Markus Kury / Cubicure GmbH <i>From Vision to Volume: Hot Lithography for Scalable, High-Precision Industrial 3D Printing</i>

18:30 /19:30	Social Activities
-----------------	--------------------------

08:30
/08:45

Registration
Palacio Miramar - Main Hall

08:45
/09:30

Plenary session
Tao Xie / Zhejiang University

Sala Julio Carlo Baroja
Chair: **David Mecerreyes** /University of the Basque Country
Dynamic covalent chemistry towards sustainable 3D additive manufacturing

Session 15
Sala Julio Carlo Baroja

Chair: **Callie Higgins** / National
Institute of Standards and Technology

Session 16
Comedor Real

Chair: **Louis Pitet** / EPFL

09:35
/10:15

Keynote
Daryl Yee
/ EPFL
(Micro)Structure Control in Architected Materials

09:35
/10:15

Keynote
Christophe Moser
/ EPFL
Volumetric Printing: what is next ?

10:15
/10:30

Leilei Song
/ Tampere University
Direct Laser Written Micro-mirror Arrays Enable 90° Incidence Angle Actuation in Light-Responsive Soft Microrobots

10:15
/10:30

Yujie Zhang
/ National Research Council Canada
Enhancing Build Volume and Precision in Tomographic Volumetric Additive Manufacturing Through Advanced Polymer Chemistry

10:30
/10:55

Invited
Matthew Becker
/ Duke University
Designing for Degradation: the Next Frontier of 3D Printing Resorbable Medical Devices

10:30
/10:55

Invited
Miryam Criado-Gonzalez
/ Institute of Polymer Science and Technology (ICTP-CSIC)
ROS-Responsive 3D Polymer Scaffolds Via Light Printing Techniques for Biomedical Applications

10:55
/11:30

Coffee Break
Salón de Música & Salón Blanco

Session 17
Sala Julio Carlo Baroja

Chair: **Daryl Yee** / EPFL

Session 18
Comedor Real

Chair: **Yanlei Yu** / Fudan University

11:30
/11:55

Invited
Carlos Sanchez-Somolinos
/ CSIC
Additive Manufacturing of Liquid Crystal Elastomers: Programming Actuation, Enabling Motility, and Advancing Autonomy in Soft Robotics

11:30
/11:55

Invited
Louis Pitet
/ Hasselt University
Light-promoted volumetric printing of tough hydrogels

11:55 /12:10	Fato Niang / Université de Montpellier, ENSCM, CNRS <i>4D Printing of UCST-based hydrogels for programmable shape morphing using DLP</i>	11:55 /12:10	Felix Wechsler / École Polytechnique Fédéral Lausanne (EPFL) <i>Overprinting applications with tomographic volumetric additive manufacturing using Dr.TVAM</i>
12:10 /12:25	Xavier Allonas Université de Haute Alsace <i>Primary Photochemical Processes Involved in 3D Printing by Vat Photopolymerization</i>	12:10 /12:25	Johanna Vandenbrande / Lawrence Livermore National Laboratory <i>Expanding the Scope of Materials Accessible to Volumetric Additive Manufacturing</i>
12:25 /12:40	Buse Unlu / EPFL <i>Accelerating Two-Photon Polymerization Via Single-Photon Activation</i>	12:25 /12:40	Chantal Paquet / National Research Council of Canada <i>Materials and methods for generating 3D electronics with volumetric additive manufacturing</i>
12:40 /12:55	Sebastien Blanquer / CNRS-University of Montpellier <i>Approaches to Print High Performance Polymer by DLP</i>	12:40 /12:55	Samantha Catt / Heidelberg University <i>Macromolecular Design of Inks for 3D Microprinting</i>
12:55 /14:10	Lunch Break Salón de Música & Salón Blanco		

Session 19
Sala Julio Carlo Baroja

Chair: **Daniele Mantione** / POLYMAT,
University of the Basque Country

14:10 /14:40	Keynote Lorenzo Moroni / Maastricht University - MERLN Institute for Technology-Inspired Regenerative Medicine <i>Sustainability of Additive Manufacturing Technologies to create Smart Scaffolds for Regenerative Medicine</i>
14:40 /15:05	Invited Leah Appelhans / Sandia National Laboratories <i>3D PhotoROMP: Using light to control ring-opening metathesis polymerizations for 3D printing</i>
15:05 /15:20	Mehmet Akif Sahin / Technical University of Munich <i>Active Flow Sculpting for the Next Generation of 3D Printing Nozzles</i>

Session 20
Comedor Real

Chair: **Cristophe Moser** / EPFL

14:10 /14:40	Keynote Yanlei Yu / Fudan University <i>4D Printed Adaptive Soft Robots of Liquid Crystal Elastomers</i>
14:40 /15:05	Invited Virgilio Mattoli / Istituto Italiano di Tecnologia <i>From Tattoo Electronics to 3D Microdevices: Soft Microsystems via Two-Photon Lithography</i>
15:05 /15:20	Yiying Zou / Technical University of Munich <i>3D Hydrodynamic Flow Lithography</i>

15:20 /15:45	Invited Fergal Coulter / ETH Zurich <i>AddOn Manufacturing : A multi-axis, multi process additive manufacturing system to print on top of existing surfaces</i>	15:20 /15:45	Invited Arnaud Spangenberg / Institut de Science des Matériaux de Mulhouse <i>Reconfigurable and programmable materials for light-induced 3D & 4D printing</i>
15:45 /16:00	Christoph Spiegel / Heidelberg University <i>Supramolecular Ink Design Approach for Multiphoton 3D Laser Printing of Soft Materials</i>	15:45 /16:00	Bruno Zhulan / SEAM, South East Technological University <i>Layer-Wise in-situ Remelting in Laser Powder Bed Fusion of Ti6Al4V: Microstructural and Mechanical Implications</i>
16:00 /16:15	Itxaso Calafel Martínez / POLYMAT, University of the Basque Country <i>In-Situ Microfibrillated Pp/Pet Composites by 3D Printing</i>	16:00 /16:25	Invited Blair Brettmann / Georgia Institute of Technology <i>Linking material properties and processing in 3D printing dense pastes</i>
16:15 /16:40	Invited AJ Boydston / University of Wisconsin <i>Multimaterial Actinic Spatial Control (MASC) Additive Manufacturing of Organic-Inorganic Multimaterial Parts</i>		

20:00
/23:00

Gala Dinner
Ténis Ondarreta

Ténis Ondarreta / Eduardo Chillida Pasealekua, 9, 20008 Donostia

Please come at the event with your badge.

A welcome cocktail will be offered at your arrival.

If you wish to stay longer after the dinner, the bar will be open.

09:15
/09:30

Registration
Palacio Miramar - Main Hall

09:30
10:15

Plenary session
Emily Davidson / Princeton University

Sala Julio Carlo Baroja
Chair: **Eva Blasco** / University of Heidelberg
Directed Self-Assembly of Nanostructured Polymers via 3D Printing

Session 21
Sala Julio Carlo Baroja

Chair: **Miryam Criado-Gonzalez** / ICTP-CSIC

10:20
/10:50

Keynote
Alshakim Nelson
/ University of Washington

Additive manufacturing of protein-based mechanical metamaterials

10:20
/10:50

Rakine Mouhoubi
/ ICGM
Digital Light Processing 4D Printing of Liquid Crystal Elastomers: Overcoming Limitations in Mesogen Alignment

10:50
/11:20

Coffee Break
Salón de Música & Salón Blanco

11:20
/11:35

Fabio Caltanissetta
/ Caracol AM
Exploring Sustainable, High-Performance Thermoplastic Materials for Architectural and Construction Applications through Robotic Large-Format Additive Manufacturing

11:35
/11:50

Oihane Varela Manrique
/ POLYMAT, University of the Basque Country
New Generation of Tetraphenylborate-based Photobase Generators for Additive Manufacturing

11:50
/12:05

Young Keynote
Best Young Oral in the Young Symposium
To Be Announced

12:15
/12:45

Award Cerimony & Final Remarks
Sala Julio Carlo Baroja

Haritz Sardon / University of the Basque Country
Timothy Long / Arizona State University
Eva Blasco / University of Heidelberg

Session 22
Comedor Real

Chair: **Fernando Vidal Peña** / POLYMAT, University of the Basque Country

10:20
/10:50

Invited
Jeremy Odent
/ University of Mons

3D-Printed Functionally Graded Matters

10:20
/10:50

Qianyi Zhang
/ EPFL
Overcoming scattering in tomographic volumetric bioprinting using computational light optimization

11:20
/11:35

Mirko Maturi
/ Universidad de Cadiz
Surface-modification of inorganic nanofillers for photopolymerization-based 3D printing of high-performance functional polymer nanocomposites

11:35
/11:50

Iraia Osquilla
/ University of the Basque Country
3D printed protein scaffolds incorporated with fibrous biopolymers for tissue engineering

11:50
/12:05

Clara Garcia-Astrain
/ POLYMAT, University of the Basque Country
Monitoring Disease in 3D Printed Cell Models

POSTER COMMUNICATIONS

/01	Erem Ahmetali	Karlsruhe Institute of Technology (KIT)	<i>Photodynamic Dibenzazepine Chemistry for 3D Printing</i>
/02	Yiyi Zou	Technical University of Munich	<i>3D Hydrodynamic Flow Lithography</i>
/03	Mohammad Amini	CIC NanoGUNE	<i>Multifunctional Conductive Polymer-Hydrogel Scaffolds for Cardiac Tissue Engineering via Melt Electrowriting and Electrospinning</i>
/04	Iker Arrizabalaga	Asociación de la Industria Navarra	<i>Biocompatible and Biodegradable Poly(4-hydroxybutyrate)-based Photocurable Resins for Vat Photopolymerization 3D Printing</i>
/05	Nahel Blanc	LTI-LRCS	<i>3D printing of batteries via sol-gel deposition</i>
/06	Paula Carlos Tadeu	Universidade de Coimbra	<i>Allyl cellulose (AC) as a sustainable feedstock for the 3D-printing of all-cellulose hydrogels</i>
/07	Harshada Chothe	Luxembourg Institute of Science and Technology/ University of Luxembourg	<i>Enhancing Heat Dissipation in Additively Manufactured High-Performance Polymers Using Thermally Conductive Reinforcements</i>
/08	Pedro Guerrero	University of the Basque Country - UPV/EHU	<i>Development of Protein-Based Solutions For 3D Printed Scaffolds as Cartilage Substitutes</i>
/09	Mona Maria Hämmerle	Institute for Molecular Systems Engineering and Advanced Materials	<i>Micro-Sized Mixed Conducting Hydrogels Via 2-Photon Lithography for Organic Electrochemical Transistors and Cell Interactions</i>
/10	Jacak Jaroslaw	University of Applied Sciences	<i>Multiphoton Nanolithography With Proteins</i>
/11	Iris Lamparth	Ivoclar Vivadent AG	<i>Development of Fracture Tough 3D Printed Dental Materials</i>
/12	Sima Lashkari	POLYMAT, University of the Basque Country	<i>Additive Manufacturing of LiFePO₄ using VAT Photopolymerization</i>
/13	Naroa Lopez Larrea	POLYMAT, University of the Basque Country	<i>Multifunctional and 3D Printable PEDOT-Based Materials for Bioelectronics</i>
/14	Gianluca Bartolini Torres	Royal College of Surgeons in Ireland (RCSI)	<i>RAFT-mediated 3D Printing of Polylactone/Itaconates with Polypeptide Surface Functionalisation</i>
